-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: The applicant is requested to provide the US Application Serial Number in pages 1, 3, and 6. In page 4, line 17, change " Figures 2A and 2" to --Figures 2A and 2B--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 5, 7-12, 31-34, 35 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Wu et al (US Patent 6,396,451).

Wu et al discloses, in figures 1-3, an antenna system comprising a plurality of antenna elements 12, a three-dimensional frequency selective surface 20 entirely covered the plurality of antennas. Figure 2 shows that the FSS has a plurality of layers.

Claims 1-3, 6, 8, 9, and 34-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Sureau (US Patent 5,579,024).

Sureau discloses, in figures 1-4, a frequency selective surface which is used for an antenna comprising a surface 10 having a plurality of electrically connectable elements 14, a plurality of switches (12,13) connected to the elements. Figure 4 shows that the FSS has a plurality of layers.

***Allowable Subject Matter***

Claims 13-29, 30, and 38-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The patents to McKinzie, Diaz et al, Sureau, Brown et al, Osterhues et al, Tsukamoto et al, Lilly et al, and Cahill are cited as of interest showing the FSS similar to that disclosed.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (571) 272-1822. The examiner can normally be reached on M-F (8:00AM - 5:00PM).
